

News Flash...

Years of research and development allow Iyashi Dôme to continue innovating; ID Senses, our 5th model completes beautifully the purifying, slendering and regenerating effects of our apparel with a refreshing organic breeze.

ID Senses

Combining Oxygen and organic essential oils with the benefits of Iyashi Dôme

From cell regeneration to mental stimulation, oxygen is quintessential for our body to function properly. The air that we breathe only contains 20.9 percent of oxygen, notwithstanding the fact that this same percentage is altered with our ever-stimulated lifestyles.

IYASHI DOME introduces its latest model: the ID Senses

The unique combination that associates the organic benefits of our far infrared rays with oxygen aromas

By increasing the amount of oxygen in the air that we breathe, vital functions of our organism are stimulated. Our system produces over 30-50 percent more oxygen than in the atmosphere.

This oxygen-enriched air is then purified with a built-in anion generating system, which is then blended in pre-dosed essential oils for a unique olfaction experience, where pleasure rhymes with your well-being.

All our essential oils are AB and ECOCERT certified and come in three declinations: Vitality, Serenity and Synergy for an invigorating, a relaxing as well as an uplifting effect respectively.
